3 July 1984

Dear Michael,

You were good to send me the extra paddle. I have not put it into practice, but it appears much more uniform than the other one. I was certainly pleased to be able to get the beads from you. I think that they will work all right with some talcum powder to remove the stickiness. Time will tell more about their performance. They seem to be exactly the same kind that I started off with in 1942. Professor Holbrook Working bought some for himself in the millinery district on 46th Street in New York. He was going back for more, and I asked him to get some for me, which he did, and I have used them ever since. Loss, one by one, reduced their numbers to the point where I was looking around for a new supply, so I was glad that you could help me out. I send best greetings and remain

Sincerely yours,

W. Edwards Deming

Dear Mike,

It did me good to receive your letter of the 16th January. Herewith is a cheque for \$110 to pay for a bead-box game, plus 200 extra red beads, plus 800 extra white beads. My best greetings to you and to Bill Boller, and to Pete. I remain

Sincerely yours,

W. Edwards Deming
